Projectdescription		
In order to send you a detailed quote, we need the following questions answered:		
<hr/>		
1. Intended use (Description):		
<hr/>		
<hr/>		
<hr/>		
2. Total (vertical) load:		
<hr/>		
3. Nature of load: a) static		
b) dynamic		
-maximum load F_{max} =kN		
-minimum load F_{min} =kN		
<hr/>		
4. Distribution of load:		
(possibly add a sketch!)		
<hr/>		
5. Permanent load:		
<hr/>		
6. total horizontal load:		
<hr/>		
7. provided number of rollers:		
<hr/>		
8. Attachment of rollers:		
(possibly add a sketch!)		
-horizontal, rollers downwards		
-horizontal, rollers upwards:		
-vertical (as in the example of a telescope guidance):		
-lateral, axis of roller vertical		
<hr/>		
9. Maximum dimensions:		
<hr/>		
10. Rolling surface and condition:		
<hr/>		
11. Are guide rollers required?		
(arrangements acc. to drawing 12)		
<hr/>		
12. Strength of rolling surface:		
<hr/>		
13. Length of movement:		
<hr/>		
14. Speed of movement:		
<hr/>		
15. Frequency of movement:		
<hr/>		
16. Special working-temperatures :		
<hr/>		
17. other important details (ie safety precautions)		
<hr/>		
18. Is protection against corrosion necessary?		
<hr/>		
<hr/>		
We vow to keep your information confidential and will not use these quotations for other offers.

Projectdescription		Page 2
19. Gauge or width of the track:		
20. Tolerances of the rail or track::		
21. Manner of the guide of the Roller Skates:		
22. Arrangement of guide rollers: (see catalogue page 12+13)		
23. Manner of fixation of Roller Skate:		
24. Protection against torsion or twisting::		
25. Danger of bending of track?		
26. Distribution :		
during standstill		
in case of movement		
27. Lubrification necessary?		
We vow to keep your information confidential and will not use these quotations for other offers.
