

Roller Skate – The Robusts – Complete Transport Kit

Anwendungsbereich:

- With the Hercules you do not have to waste time in assembling the unit, and the low level contributes to safer working conditions.
- The Hercules makes it easier and safer to move heavy loads. 24 and 30 mm diameter rollers in the chain are available. This turntable is larger than the one in the Transport Kit N.
- For larger loads we recommend the use of a second twin Skate Roller with turntable in the front, and two normal skates as stabilisers at the back.
- Also available with polyamide chain rollers (PA6) with lower capacity to protect your floor against markings or damages.
